Using the XMLHttpRequest Object

Hello XMLHttpRequest

2.

The XMLHttpRequest Object

Start typing a name in the input field below:

st name:

Suggestions: Tove

The screenshot shows the Network tab in the Chrome DevTools. At the top, there are various filter options like 'Preserve log', 'Disable cache', and 'No throttling'. Below the filters is a timeline with markers at 10000 ms, 20000 ms, 30000 ms, 40000 ms, 60000 ms, 70000 ms, 80000 ms, 90000 ms, 100000 ms, 110000 ms, 120000 ms, and 130000 ms. The main area displays a table with columns: Name, Headers, Payload, Preview, Response, Initiator, and Timing. There is one entry in the table:

Name	Headers	Payload	Preview	Response	Initiator	Timing
gethint.php?qt=1				1 Tove		

At the bottom of the Network tab, it says '3 requests 770 B transferred 12 B'.
